Professional Summary

Applied AI and software developer with experience contributing to LLM-powered products, retrieval-augmented generation (RAG), prompt engineering, AI agent evaluation, workflow automation, and web applications. Combines product discovery and solution design with hands-on implementation, debugging, and validation using Python, JavaScript/TypeScript, React, Next.js, Node.js, LangChain, MongoDB, and n8n.

Experience

Operations Associate (Product & Engineering Operations) — **Seconds**
Remote — *Dec 2025 – Sep 2026*

- Contributed to AI product development across SmartLeads, OneClick, and HoverTime, translating product problems into feature requirements, workflows, prototypes, implementation support, and validation.
- Designed and iterated on LangChain/RAG prompt-to-lead workflows, including prompt-to-keyword generation, candidate retrieval, contextual relevance comparison, and structured result handling.
- Developed relevance-scoring criteria and Tier 1/2/3 qualification logic; prompt iterations improved results from approximately 2/10 to 7/10 in a manually reviewed test sample (not a production-wide metric).
- Evaluated AI agents and LLM features for relevance, accuracy, missing or unsupported content, and edge cases; tested meeting summaries, action items, searchable meeting memory, and voice-to-text workflows.
- Independently built most internal **n8n** automations integrating **Slack, Google Drive, and Google Sheets**, including leave management, knowledge lookup, structured task intake, and idea submissions.
- Investigated duplicate-event handling and contributed to API/data workflows, product requirements, debugging, beta-feedback tracking, and prompt/output comparisons using exploratory LangSmith traces.

Web Developer (React.js) — **Saral Tech**
Remote / Pune, Maharashtra — *Jan 2025 – Dec 2025*

- Developed and maintained React.js interfaces for a trading platform and online course platform, including responsive components, dashboards, course listings, and UI updates.
- Maintained a client ticket-booking system and integrated REST APIs to support reliable user workflows and ongoing improvements.

Web Developer (React.js / JavaScript) — **TechSolutions**
Pune, Maharashtra — *Dec 2023 – Jan 2025*

- Developed and maintained web applications using JavaScript, React.js, Node.js, and Express.js, building responsive interfaces with HTML and CSS.
- Integrated REST APIs, supported deployment and legacy-application updates, resolved client bugs, and used Git for version control.

Projects

Social Media Content Fact-Checking Chrome Extension | *JavaScript, Manifest V3, Gemini*
- Built a prototype to help users examine social-media posts and Reels using DOM caption extraction, screenshot-based Gemini Vision analysis, and backend API integration.
- Implemented and tested suggested questions, reset/state handling, and content changes across Reels with AI coding tools supporting development and debugging.

AI Resume Builder | *Next.js, TypeScript, React Hook Form*
- Developed a full-stack application with authentication, role-based access, billing workflows, and AI-assisted content generation.
- Debugged PDF export rendering across Chrome, Firefox, and Safari, verifying generated output across browsers.

Real Estate Application | *MongoDB, Express.js, React.js, Node.js*
- Built a MERN application with authentication, CRUD operations, search, filtering, routing, and MongoDB-backed Node.js/Express services.

Technical Skills

AI / LLM: LLM Applications, Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, AI Agents, Structured Outputs, Relevance Scoring, LLM Output Evaluation, Gemini Vision
Programming: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3
Web / Backend: React.js, Next.js, Node.js, Express.js, REST APIs, API Integration, Authentication
Automation: n8n, Workflow Automation, Slack, Google Drive, Google Sheets
Data / Databases: MongoDB, MySQL, Data Retrieval, Data Processing
Testing / Tools: Manual AI Evaluation, Prompt Comparison, Edge-Case Testing, LangSmith (exploratory), Git, GitHub, Postman, VS Code, Chrome DevTools, Figma, Vercel, Supabase, Claude Code

Education

PDEA College of Engineering, Hadapsar, Pune **2020 – 2024**
Bachelor of Engineering (B.E.) in Mechanical Engineering *CGPA: 8.02*

Certifications & Training

Coding Ninjas **Nov 2024 – Present**
Full Stack Web Development *MongoDB, Express.js, React.js, Node.js, Data Structures and Algorithms*
